PRELIMINARY MAP NO. 32

GEOCHEMICAL ORIENTATION SURVEY – HAZELTON AREA, BRITISH COLUMBIA
(93M/3W, 4E)

By T. E. Kalnins

In September 1978, the Rocher Deboule Range (93M, Hazelton, SW) was selected for a stream geochemical orientation study to assist in the interpretation of results of the Accelerated Geochemical Survey being conducted in adjacent Terrace (103I) and Nass River (103P) map-areas. The Rocher Deboule area was chosen because it is known to host multi-element mineralization including many of the elements analysed for in the Accelerated Geochemical Survey.

Figure 1 shows the survey areas. Figure 2 is a composite map of the geology, letter-coded mineral occurrences, and numbered sample location sites of the orientation survey.

Table 1 presents analytical results of stream sediments and stream waters. Sample sites were chosen above known workings to minimize possible contamination.

Stream sediment analyses range from background values for those samples distant from known prospects to anomalous values near reported mineralization. Relatively high uranium in stream waters is indicated by values greater than .10 ppb uranium.

Analytical method:

Minus 80 mesh silt sample digested in a mixture of hot dilute nitric and hydrochloric acid, and analysed by conventional atomic absorption spectroscopy.

Uranium in water (U-W) — fluorometrically.

Fluoride in water (F-W) — ion specific electrode.

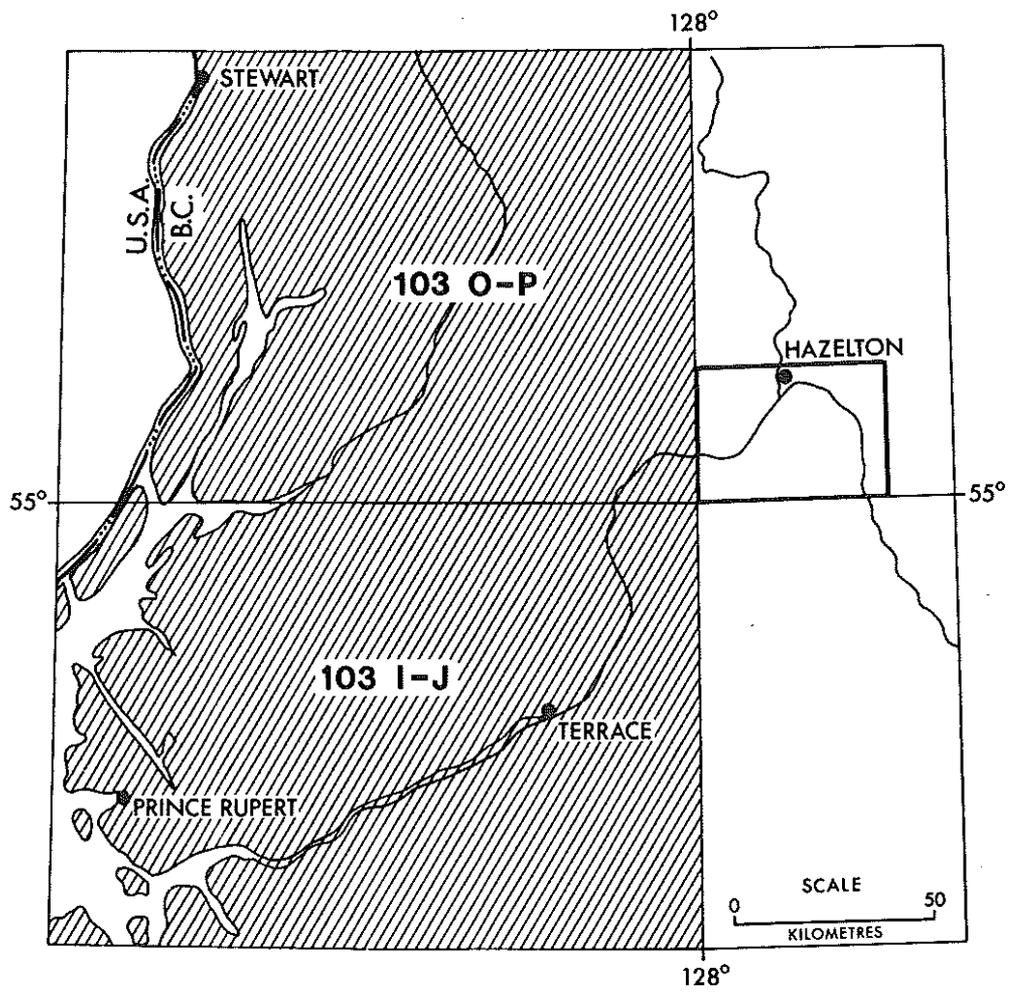

Figure 1. Location of orientation survey relative to accelerated geochemical survey coverage.

LEGEND

PLEISTOCENE AND RECENT

DRIFT AND ALLUVIUM

UPPER CRETACEOUS

INTRUSIVE ROCKS: QUARTZ MONZONITE, GRANODIORITE, QUARTZ DIORITE, AND PORPHYRYTIC AND FINE-GRAINED EQUI-VALENTS

LOWER CRETACEOUS

BRIAN BORU FORMATION: PREDOMINANTLY PORPHYRYTIC ANDESITE FLOWS

RED ROSE FORMATION: SHALE, SILTSTONE, GREYWACKE, CONGLOMERATE, HORNFELS

SYMBOLS

- 1 A DALEY WEST (Cu, Au, Ag)
- 2 B GOLDEN WONDER (Cu, Ag, Au, Sn, Ag)
- 3 C CAP (Cu, Zn, Ag, Au)
- 4 D VICTORIA (Au, Mo, Cu, U, Ag, As, Co, Zn)
- 5 E ROCHESTER DEBOULE (Cu, Au, Ag, Pb, Zn, U)
- 6 F GREAT OHIO (Cu, Pb, Zn)
- 7 G SPAULDING (Cu, W, Ag, Au)
- 8 H ----- (Mo, Cu)
- 9 I BLUE LAKE (Mo, W, Cu, Au)
- 10 J BLACK PRINCE (Cu, W, Mo, Sn, Au, U)
- 11 K LONE STAR (?)
- 12 L ----- (Mo)
- 13 M ----- (Cu)
- 14 N RED ROSE (W, Cu, Mo, Au, Ag)
- 15 O BRUNSWICK (Ag, Pb, Zn, Au, Cu)
- 16 P ----- (Mo)
- 17 Q ----- (Mo, Cu)
- 18 R SULTANA (Mo, Ag, Cu, Au)
- 19 S BIG THING (Mo, Cu)
- 20 T HIGHLAND BOY (Cu, Au, Ag, W, U, Sn)
- 21 U HECLA (Au, Cu, Ag)
